MODEL CE517 XHD **SCRAP CHOPPER**

CE

An Excellent Chopper for Processing Large Volumes of Linear Scrap

The Model CE517 XHD provides a large cutting capacity. This is the chopper of choice for custom applications or for operations converting substantial quantities of linear scrap materials.

Prepared for an abusive environment, the CE517 XHD has a strong 12.7 mm plate steel housing. It also features a magnetic starter to protect workers from an unexpected restart after loss of power. The powerful air activated feedworks is controlled with a footswitch for operator safety, and is also capable of despooling scrap materials from reels. The CE517 XHD is designed to fit on a Sweed stand that will accommodate a Sweed EZ Dump Hopper. **Custom stands and additional safety upgrades are also available.**

Material Reference
